

BLOCKPRO NEWS

GLASS BLOCK SYSTEMS AND NATIONAL NETWORK

BlockPro's 3rd Consecutive Year in the IBS Featured Model Home

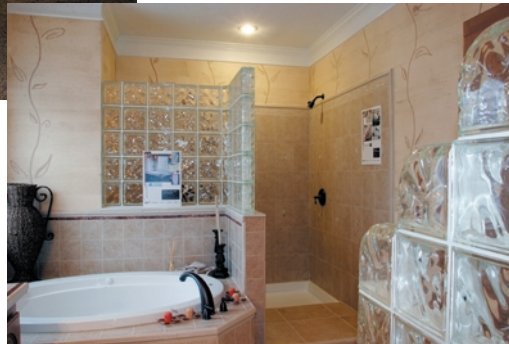

What you may have missed at the International Builders show in Orlando January "2005"

Palm Harbor Homes "A Touch of Glass helped create a feeling of well being" Palm Harbor Homes is the nations largest brand of multi-section manufactured homes. Margie Lewis-Wright, their director of design, stated that the Glass Block applications (in the living room and master bath) helped them achieve their goal of creating an "open" home plan with a panoramic feel. The Glass Block had a translucent richness while providing a spatial partition to reinforce the integrity of the house plan. The walls provided an Architectural Statement while harmonizing with the flowing lines of the bathroom design to give you a "feeling of well being". The glass block wall between the office and hallway brought the outside world in, while providing privacy to provide a cozy unconfined environment.

Sketchup 3-D Cad Drawings BlockPro converted their existing plan, enhanced with glass block, and provided 3-D drawings to Palm Harbor for their comments and approval for the project. This life like plan facilitated the design process allowing Palm Harbor Homes to realize their design objectives.

Modular Wall Construction BlockPro, through their national network of manufacturing facilities pre-fabricates "real" glass block windows, walls, showers and floors to your specifications in modular sections to be shipped directly to the site for a simple, efficient, and extremely fast installation.

As the #1 rated glass block in the industry, Pittsburgh Corning Glass Block provides unmatched quality and performance through a variety of patterns, styles and systems. Pittsburgh Corning Glass Block and the excellent design and installation services available through the BlockPro group provide the perfect combination you are looking for to add that special touch and value to your homes.
