Answer to
All of Your
Glass Block
Needs**

BLOCKPRO™

VINYL WRAP®

Real Glass Block Windows

Introduced nearly a decade ago, Vinyl Wrap® was the first vinyl frame system available to the REAL Glass Block industry. Vinyl Wrap® is engineered to last a lifetime, offering the largest variety of custom choices including:

- Frame color
- Block width and pattern options
- Step-down designs
- Custom retrofit sizes

SKETCHUP

3-Dimensional Design Program

SketchUp® is a powerful new CAD tool that brings your 2-dimensional plans to life! To realize the enhancing benefits of a 3D-illustrated glass block shower design in your home plans, simply contact your closest BlockPro Independent Company.

Custom Shop Drawings

Shower Plan Catalog

Over 100 different shower designs have been created in multiple formats to easily import into your future home plans

INSTA-CURB™

Layout Card Templates

Layout Cards represent the exact size and shape of every Pittsburgh Corning Glass Block. The cards fit together like jigsaw pieces, providing an instant template for thousands of possible glass block designs.

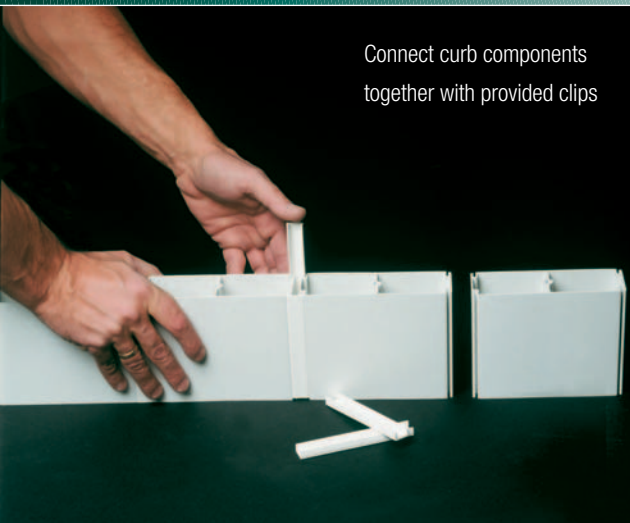

Shower Curb System

Insta-Curb™ Components are a functional form that eliminate the need for time-consuming wood or masonry curb cores. Each Curb Component represents the exact shape and length of the Pittsburgh Corning Glass Blocks being used. Snap the components together with the clips provided, then screw or glue the curb assembly to the floor for an exact layout every time.

Now simply finish the water-proof liner and mud-work that is typical in constructing a mud-set shower pan.

Connect curb components together with provided clips

Screw to wood subflooring.

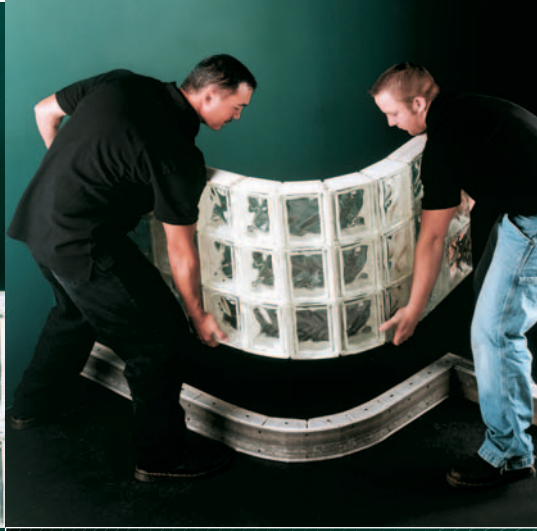

Or glue to concrete with construction adhesive

Fill hollow cells with mud pack or concrete

MODULAR WALL

BlockPro Companies pre-manufacture your Modular Shower Wall sections to any shape, size, or configuration, reducing installation time dramatically!

These Modular Wall sections are secured with silicone adhesive and mechanically fastened to the framed wall. The surface joints are finished by applying our high-strength water-repelling grout

Modular walls can be crated and shipped direct to the jobsite.

Pre-Constructed Glass Block Wall Units

BLOCKPRO™

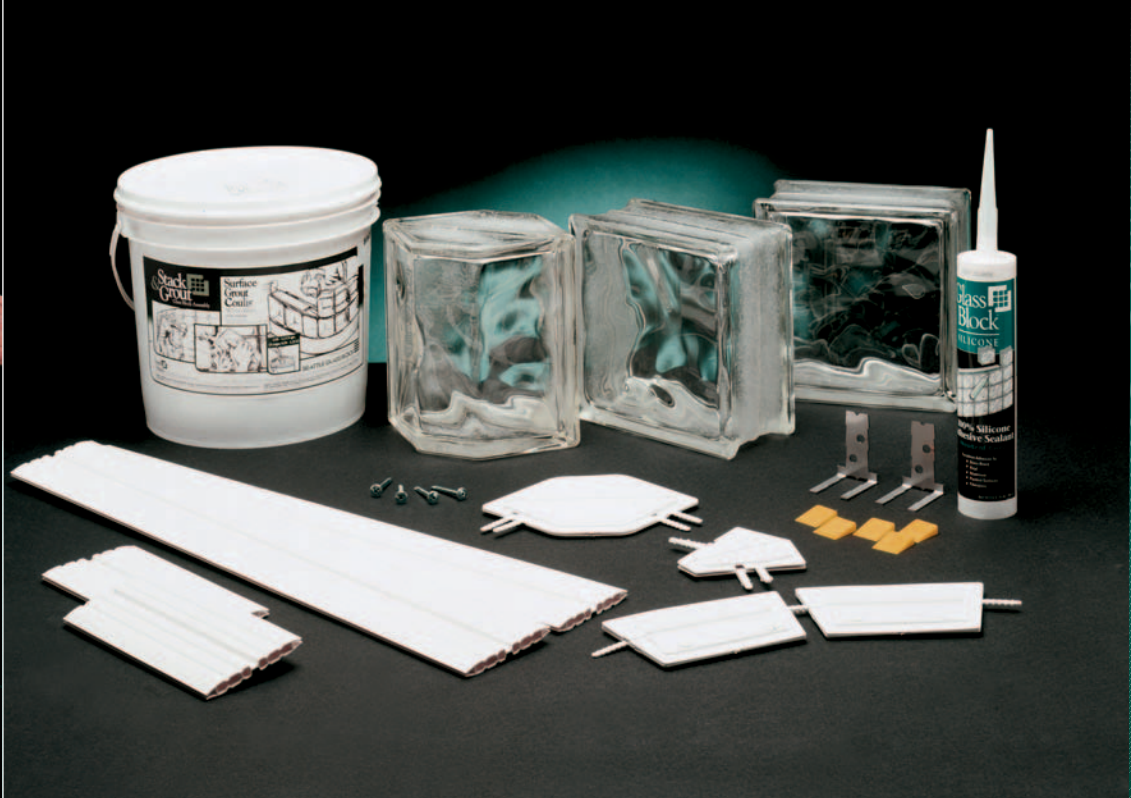

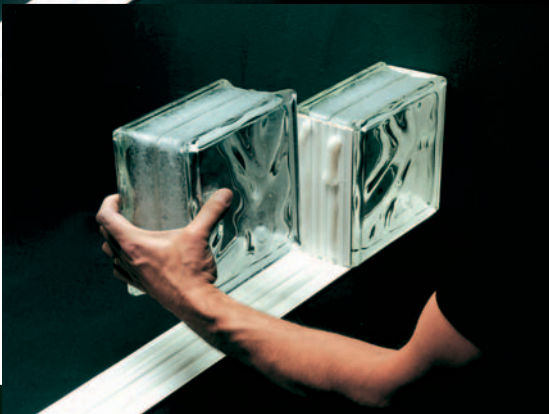

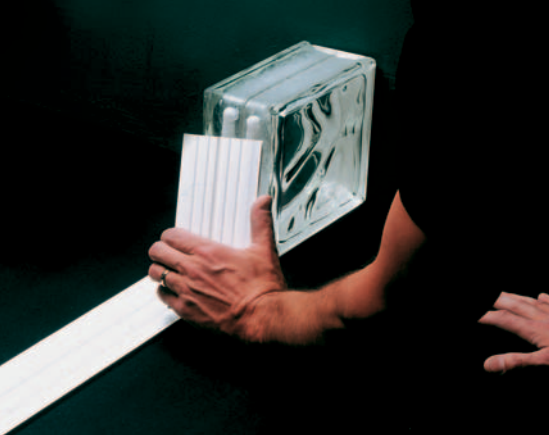

STACK & GROUT™

Glass Block Installation Kits

Complete kits customized to your exact Pittsburgh Corning Glass Block application

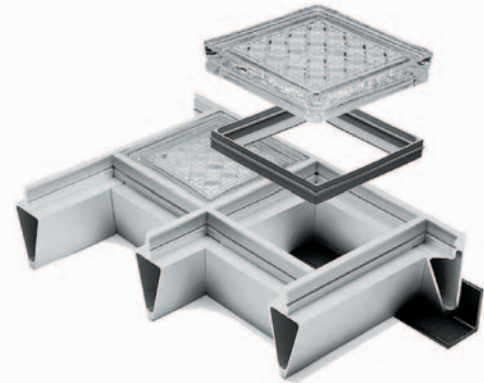

Say goodbye to the messy and difficult process of the traditional mortar build. Now virtually any Pittsburgh Corning Glass Block configuration can be constructed with ease and accuracy using this new mortar-less system.

Simply silicone the appropriate Vinyl Stack® spacer to each Pittsburgh Corning Glass Block for perfect spacing and alignment, then finish the surface joints with our high-strength water-repelling grout.

**Pre-engineered
Structural Glass
Floor System**

GLASS WALK™

GlassWalk™ is the latest innovation by IBP. This pre-engineered structural glass floor system is simply installed on site to allow natural light to flow through while offering amazing visual appeal. Choose clear glass, or specify a slip-resistant ceramic texture fused directly to the surface.

GlassWalk™ series offers more choices than ever: 6-inch square pavers, 8-inch square pavers, and now structural glass.

NATIONAL NETWORK

Simply The Best

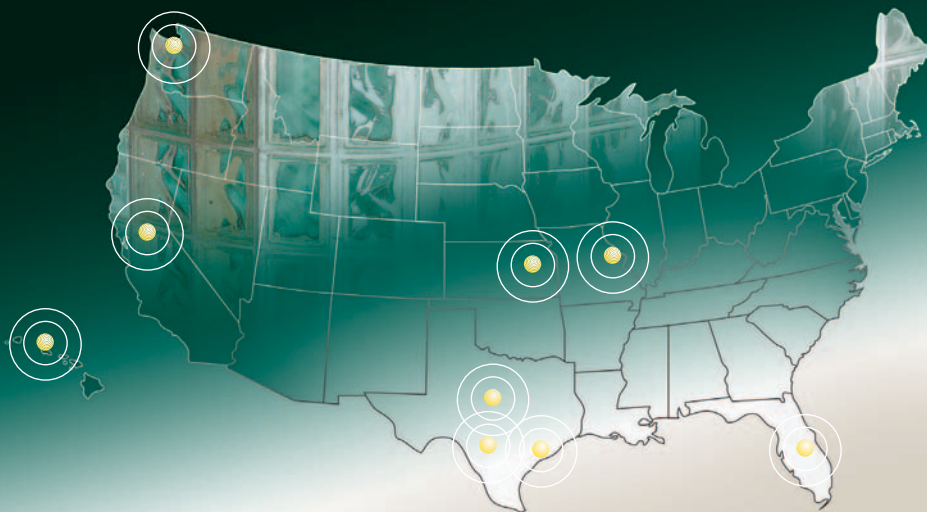

On The Block

BlockPro, an alliance of glass block industry leaders, forges a commitment to excellence heretofore unknown in the trade. Our driving goal: creating unequaled customer satisfaction with this uniquely elegant product through the dynamic innovation of solution-based systems.
